

BP and their partners are planning to bring cables from their wind farms on shore at Blackpool ripping a 100m wide cable corridor 30Km long across the WHOLE OF THE FYLDE, destroying more than 600 acres of greenbelt, farmland, and natural habitats, including two massive substations industrialising 90 acres of greenbelt and separation land (that's almost 50 football pitches).

**This will result in noise and dust pollution for up to 6 years.
24/7 buzzing from substations near schools, businesses and homes.
It will destroy wildlife habitats, cause flooding, ruin livelihoods,
close businesses, and change the way we live.**

- Beach closures
- Tourism affected
- EMF harming protected species
- Compounds, heavy machinery, drilling and years of dust pollution
- Flight disruptions for years
- Prime grade greenbelt farmland destroyed
- Chaos on the roads of the Fylde for years
- Livelihoods lost
- Businesses closed
- Thousands of tonnes of concrete in already waterlogged land
- Huge increases of HGV traffic through our villages
- Loss of greenbelt land
- Massive substations built near homes and schools
- Up to 6 years of 6 days a week construction, 7am - 6pm, at least!

Registration window is 13th December 2024 to 27th January 2025
